

Bowers & Wilkins

P5 Series 2 On-Ear Headphones

P5 Series 2 headphones deliver a truly revelatory sound experience, thanks to an all-new drive unit design inspired by our Hi-Fi speakers, and adapted from our flagship P7 headphones. P5 Series 2 comes from Bowers & Wilkins, an audio company with close to five decades of experience creating the loudspeakers that world-leading recording studios such as Abbey Road depend upon. **Listen and you'll see.**

Reasons to buy **P5 Series 2** On-Ear Headphones

Acoustics

Great sound P5 Series 2's sound is wonderfully open and spacious. Bass is powerful but also natural and tightly controlled. Detail is revealed and brought to life. The new P5 Series 2 offers amazing sound, everywhere.

Features

Design and materials P5 Series 2 uses only the finest materials such as soft leather and aluminium. Everything is understated, yet imbued with a sense of style. They are light, unobtrusive and above all, wearable thanks to their luxuriously comfortable fit.

Drive units P5 Series 2 adopt a driver that works more like the drive unit in a Hi-Fi speaker, with a diaphragm focused purely on the job it's supposed to do: generate sound. This means a drive unit with a more precise, controlled movement – and a giant leap forward in sound quality.

Portability P5 Series 2 is designed for music on the move. Light, and comfortable and with cables to plug into your smartphone, tablet or computer, they deliver pristine sound whenever you want, wherever you are.
